Pram

Street Food Gazebo

The Churros Box

Fire Engine (COMING 2024)

Horse Box

Giddyup Go

Built on a vintage horse trailer, but designed to have a totally different look to most of the converted Rice horseboxes on the circuit in the UK. Capable of being used for any of our catering options. Including burger and chips, gin/prosecco and a multitude of desserts.

Oh, and the name? Whilst arguing over what to call it we happened to be listening to a Country and Western station and a Red Sovine song came on, called, yup, Giddyup Go!

Little Red Van

Our Little Red Citroen Van

For when you want something a little different, but with a touch of French Flair. Based on the venerable 2CV van, our little red Citroen just oozes gallic charm. Perfect for smaller catering options such as doughnuts or coffee (or even both), this attracts attention wherever it goes.

Its in built computer screen and easily brandable panels make it a great choice for corporate events such as sales promotions or brand activations.

Va Va Voom, as the French would say!

Trike & Pram

For smaller spaces or venues, the trike is a fabulous option. Obviously it isn't big enough to serve burger and chips, but if you want Pimms, ice cream, strawberries and cream or our other dessert options then this ticks all the boxes.

The large freezer section and parasol provide plenty of space for branding options if you are running a promotional event. The eutectic plate means that many events can be covered without electricity needing to be supplied.

Pop Up Street Food

Especially for outdoor events, our new streetfood themed range, with more space and flexibility for larger events. Coupled with our interchangeable panel system this means we can theme the stalls to suit your brand or style.

Perfect for when the weather is a bit more British. Ie. chucking it down. Great with our range of burgers, but equally suitable for desserts, drinks or any other combination.

The HY Van

A custom built replica vintage Citroen HY van. Cool Gallic style which makes a great centrepiece for your event. From a gin or prosecco bar, to any of our dessert lines or mains catering options, this one adds a touch of French flair to your event.

With a large fold up top panel, and two optional end panels, this one makes a great canvas for promotional events.

The Fire Engine

John W. Sanders II

Big boy's toys. (or gals, hey we are equal opportunities here). This one is designed for big events. A genuine U.S.A. fire truck. Big, beautiful and loud. (Two big air horns and a 127 decibel Federal Signals Q2B fire siren).

When this hits the scene, it will have massive cooking facilities, designed for festivals or huge corporate events..

The Churros Box

Specially designed for those busy events where you need a high output churros service.

Fitted with the latest professional churros equipment from J L Blanco one of Spains top churros manufacturers.

This can keep with with demand at any event.

Of course it can also be used for any of our other services if you like the style of it.

OFAH Delboy Van

If you want the maximum attention at your event, then nothing beats 'Uncle Albert' our Reliant Regal Supervan Mk. III (No Del Boy never drove a Reliant Robin).

This allows most of our dessert and beverage services to be provided, and can even be used for smaller events with burgers or dirty fries.

The only slight drawback is that it doesn't lend itself to being custom branded, but the menu cards can, and you can always add a pop up banner or three.

Go on don't be a plonker, you know it makes sense.

Brand Activation

We offer a range of quirky vehicles, street food stalls and carts that lend themselves to being custom branded to suit your promotional events.

From a new product launch to a tour of universities, we can plan and provide services across the full UK and Europe at multiple locations simultaneously.
